

About Me

I was born in Barcelona, Spain. I have always dreamed of becoming a pilot, but I soon realized that I wanted to be innovative and create new things. After finishing High school at a German school, I applied to ETH Zurich in order to study Mechanical Engineering. My goal in life is to resolve problems that affect our society by applying technological solutions.

Name: Patrick Benito Eberhard
Date of birth: 29 May 2001
Email: patrick_benito@hotmail.com
Phone: +34 662 07 42 30

Education

ETH 2019–2020
ETH Zürich
Bsc in Mechanical Engineering

 2017–2019
Swiss school of Barcelona
High school

 2003–2017
Zürich Schule Barcelona
High school

Experience

ETH 2021–2021
Teaching Assistant in Mechanics II
ETH Zürich

2020-2020

Teaching Assistant in Mechanics I

ETH Zürich

Intralink

2021

Founder

Intralink

At Intralink we are trying to develop new B2B solutions using Whatsapp as the primary communication channel. At present, we are developing a new reservation method for restaurants using a Whatsapp Bot.

2019-2020

Maths teacher

Schlaumacher GmbH

I worked at Schlaumacher as a maths teacher and enjoy helping students to improve themselves.

2016-2020

Founder

Mydomotik

I created a product that provides 360° of domotic control in private houses and companies. Mydomotik allows controlling blinds, curtains, lights, plugs, and all kind of electronic devices or sensors through a mobile phone, tablet or web page. Thanks to this project, I improved my coding skills and learned to create my own business.

January 2020

Internship

Bitron

At ETH Zürich we are allowed to do a five-week Internship as a workshop assistant, in order to consolidate the academic content and gain an insight into design and production.

August 2019

Scientific expedition

Instituto de Astrofísica de Canarias

In order to observe the Perseid Meteor Shower, I have travelled with a research team to Oukaimeden (Morocco) and measured different parameters of the shooting stars using the parallax method. We can estimate their altitude, speed, angle of incidence and trajectory thanks to this technique.

2017-2019

Joves i Ciència

Fundació Catalunya La Pedrera

Joves i Ciència is a science program for high school students. The scholarship lasts for three years and allows young people from Spain to go further into scientific investigation. In my case, I have been submerging into astrophysics and working on a paper about gravitational waves.

August 2018

Young Brainport Summer School

Brainport Eindhoven

I have been allowed to participate at the Young Brainport Summer School in Eindhoven (The Netherlands). It offers a great experience to students from all around the world. At YBSS we have had a dive into engineering and physics applied to the industry by visiting different companies such as Phillips or ASML.

July 2018

Ruta de las Estrellas

Instituto de Astrofísica de Canarias

The 'Ruta de las Estrellas' is a scientific program that takes place at the Teide Observatory in collaboration with the [Astrophysics Institute of the Canary Islands](#). There we have been working on the analysis of asteroid light curves in order to determine different parameters, such as the rotation period or even the shape of the celestial body.

Skills

HTML, CSS, JS, PHP

Python

C++

React and Nodejs

MongoDB and MySQL

CAD (NX11 and Onshape)

Languages

English (C2 Proficiency)

Spanish (Native)

German (Native)

Catalan (Native)

Italian (Beginner)

Licenses & Certifications

June 2019

C2 Proficiency (English)

Cambridge Assessment

June 2019

C1 Goethe-Zertifikat (Deutsch)

Goethe-Institut Barcelona
